

MULTI-USE DISPENSING STAND

ABSTRACT OF THE DISCLOSURE

A multiple-type paper product dispensing mobile stand with mini-table and storage is provided. The invention can be configured in various dispensing arrangements for dispensing one or more paper products comprising paper towel rolls, toilet tissue rolls, and/or a box of paper facial pop-up tissue sheets. To this extent, one or more dispensing arrangements may incorporate an open roll holder, a hanging roll holder, and/or a web tear plate, each of which is unique to this invention. Further, various configurations allow for the storage of one or more of these products. Various embodiments of the invention also provide user conveniences such as a mini-table, wheel caster leg assemblies, and lifting knobs.
